

Thank you for your purchase, your custom is greatly appreciated!

I have set out to try and make the install of these patches as clean and straight forward as I can. I have given the below 3 options depending on your purchase.

These are just a guide for users who not used to the install of new banks.

For the more experienced I have supplied individual Patches in .syx format to allow best flexibility for your needs.

Individual .syx patches can be loaded to whatever location in the OBX8 you wish using your preferred SysEx librarian.

Using any of the below three options *should* make no changes to Banks 1, 2 or 3 in your OBX8, only Banks 4 & 5 will change. Once changes are made all original Factory sounds will still be available along with your new pack/packs.

**But please, one main note! before you Install any new patch banks, back up your current synth patch setup and store them in a safe place :)**

And once installed.... ENJOY!

Thanks again,  
Scott.
